BASIC-ABSTRACT:

NOVELTY - A web page access request is sent to one of the servers having URL of the web pages containing digital image captured by a digital camera. The user is allowed to select and view the web page of a web session. The selected web page is acquired as a multimedia file from interchangeable wireless transmitter and sent to user terminal through Internet.

USE - For accessing web session containing pictures of crime scene, accidents, scenes in resorts, amusement parks, etc., through Internet.

ADVANTAGE - Enables a user to provide a service in a number of general business areas for e.g. in resort industry, home/consumer market, photo journalism, in general sales, medical prehension, and in emergency response field. Allows the user to obtain maximum benefit of their coverage areas by the use of interchangeable wireless transmitter.

DESCRIPTION OF DRAWING(S) - The figure shows an explanatory view of web session accessing process.
